

Achieve and Maintain Compliance with SDWA

A two-part webinar • March 5 & 6, 2024

DAY 1 • MARCH 5 • 9:00 AM – 12:30 PM

Regulatory Overview: This lesson provides an overview of the updated regulatory rules for distribution systems. Topics covered include the history of public health protection, distribution system health impacts, revised total coliform rule, ground water rule, stage 2 DBP rule, and Lead and Copper Rule.

Coliform Sampling: This lesson focuses on sample collection, why it is important and sample siting plans.

Contaminants of Concern: PFA: This lesson examines the origin and concerns and provides information for small systems about protecting public health.

DAY 2 • MARCH 6 • 9:00 AM – 12:30 PM

Small System Resilience: This lesson discusses AWIA requirements for community water systems serving more than 3,300 persons. Topics include the benefits of using the RCAP/AWWA Small Systems RRA Worksheet, how to conduct an effective RRA field assessment, how to identify gaps in your Emergency Response Plan and identifying strengths and weaknesses in your system's risk mitigation practices.

Manganese: This lesson provides an overview of Manganese, its properties and why it is a concern for water systems.

Disinfection/DBP Treatment Strategies: This lesson discusses various treatment strategies available for Stage 2 DBP Rule compliance.

0.3 Alaska Drinking Water Continuing Education Units per day

0.6 Alaska Drinking Water Continuing Education Units for attending the series
