

Seeking and Managing Funding for Drinking and Wastewater Projects in Washington State

Online Workshop • April 7, 2021

Hear from seven different federal, state, and non-profit funders about funding available for drinking water and wastewater projects in Washington State. This two-part training will provide information on funding available and eligibility requirements, as well as common hurdles communities face accessing and managing funding. Attendees will receive tips, tools, and resources that will help them create, implement, and manage a successful funding package for drinking water and wastewater projects.

Attendees will learn about:

- Available funding and important deadlines
- Project and applicant eligibility requirements
- Common barriers communities experience securing funding
- Resources to help during the application process
- Resources to help manage funding long-term

This training is geared toward drinking and wastewater operators, managers, or anyone responsible for developing funding strategies for drinking or wastewater projects.

0.3 Drinking Water and 0.3 Wastewater Washington CEUs available.

When: Wednesday, April 7, 2021 • 9:00 am – 12:00 pm PST

Register online at: <https://www.events.rcac.org/assnfe/ev.asp?ID=2520>
