

Drinking Water Operator Math

for Tribal Systems in the Sacramento River Watershed

July 8, 2020 • Online

One of many skills needed by water distribution operators includes the ability to perform water math problems. This includes volume, pressure, chlorine dosage and pipe velocity. This online workshop will help the distribution operator master these formulas while utilizing the conversion sheet that is provided for the exam.

Participants attending this workshop will learn:

- Volumes
- Pressure
- Chlorine dosage
- Pipe velocity

The recommended audience includes water system operators, maintenance staff, managers and anyone who needs to use water works math routinely in their daily functions at a water treatment facility.

This workshop qualifies for 2 CA drinking water contact hours.

When: July 8, 2020 • 10:00 am–12:00 pm
