Part 1
This workshop provides an overview of the updated regulatory rules for distribution systems.
Topics covered:
• History of public health protection
• Distribution system health impacts
• Revised total coliform rule
• Groundwater rule
• Stage 2 DBP rule
• Lead and copper rule

Part 2
This workshop covers problems with common distribution system components (piping, valves, storage tanks, and hydrants) and how they can drastically affect water quality, focusing on disinfection by-products. Preventive actions and solutions to common problems are presented after discussing how disinfectant byproducts (DBPs) are formed.

Part 3
Part 3 focuses on emerging contaminants of concern namely PFAS and manganese. This lesson examines the origin, the concerns, and provides information for small systems about protecting public health.

0.6 Idaho Drinking Water Continuing Education Units awarded in total.

When: September 13, 2023 • 9:00 a.m.–4:00 p.m. (Mountain Time)
Where: Southeastern Idaho Public Health
