

# Elements of the Sampling Plan

for Tribal Systems in Sac River IRWM

September 16, 2020 • Online

Having trouble figuring out how to use the Site Sampling Plan for your water system, or do you need to change it? This workshop will cover how to read and understand your Approved Site Sampling Plan and Public Water System Monitoring Schedule.

We will discuss the elements in these SSP and PWSMS documents using examples from Tribal systems. We will go over the SSPs, how to use them or change them if needed, and review the elements of the sampling site plan map. Finally, we will talk about the types of water sample gathering techniques to be completed for the plan.

Note: If time permits we will go over attendees' Site Sampling Plan and Public Water System Monitoring Schedules and answer any questions.

*2 CA Drinking Water Contact Hours awarded.*

**When:** September 16, 2020 • 10:00 am–12:00 pm
