Protecting Source Waters:

Land Management & Wildfire Response Planning to Protect Drinking Water

October 14 • October 28 • November 4

These webinars will provide utilities with resources and contacts that will help them prepare for emergencies and specific activities they need to engage in to prepare for emergencies. Emergency response officials and land managers will better understand the interdependences between the utility and the watershed and how they can work with utilities to promote source water protection before, during, and following response activities.

Session 1 • Planning for Wildfire

October 14, 2020 • 1:00 PM–3:30 PM Pacific Time

Identify tools available for planning and wildfire preparedness. Identify risk assessment tools and other resources available to help utilities to be active participants in developing wildfire preparedness documents. This session includes a presentation on EPA's Wild Fire Incident Action Checklist.

Session 2 • Forest Land Management

October 28, 2020 • 1:00 PM–3:30 PM Pacific Time

Features presentations from U.S. Forest Service and Washington DNR professionals on forest resilience planning and management, fire management and post fire response activities. Presenters will share opportunities for utility engagement during the planning process.

Register at: <https://www.events.rcac.org/assnfe/ev.asp?ID=2310>

Session 3 • During and After the Fire

November 4, 2020 • 1:00 PM–3:30 PM Pacific Time

This session will be focused on utility perspective, lessons learned and how to prepare for wildfire within a forested watershed. Learn about local initiatives, partnership and possible funding opportunities.
