8:00 am – 3:00 pm (PST)

San Carlos Unified School District Training Center

100 San Carlos Avenue, San Carlos, Arizona 85550

NAWMA Eastern Arizona

In the arid Southwest, there will always be a need for new tribal operators to be stewards of our most precious resource. The focus of this workshop is twofold, to prepare participants to take their operator certification test & to assist current operators in the exercise of their duties. This in-person event will allow participants networking opportunities & the chance to benefit from the collective knowledge in the room.

The operator certification test preparation topics covered:

- Water system components
- Water chemistry
- Disinfection
- Operator math

Participants will have the opportunity to take a mock certification practice test to gauge their knowledge.

Topics covered for the busy operator:

- Consumer Confidence Reporting
- Service Line Inventory Requirements
- Emerging Contaminants PFAS

These topics will allow tribal operators to maintain compliance with safe drinking water regulations, & provide safe water to their communities.

6 AZ Professional Development Hours awarded.
