

Private Well and Septic System Operation and Maintenance Workshop

November 4, 2017 • Caldwell, ID

Private Well Owners: When was the last time you had your well tested? Do you want to learn more about protecting your groundwater and the issues that can impact drinking water? Are you having well or septic system problems?

Attend this workshop and bring a three ounce sample of your well water to get a free water quality test for nitrate. Nitrate is commonly associated with wastewater contamination. Join RCAC to learn more about your private well and septic system!

The workshop will educate well owners on proper operation and maintenance of drinking water wells and septic systems, common troubleshooting of domestic well and septic system, preventive maintenance and solutions.

Workshop topics include:

- Understanding the importance of water quality
- Understanding the geology and aquifer of wells
- Well system operation and maintenance tips
- Septic system operation and maintenance tips

Cost: Free

When: Saturday, November 4, 2017 • 8:30 a.m.–12:30 p.m.

Where: Southwest District Health
13307 Miami Lane • Caldwell, Idaho 83607
